

SANJEET VINOD JAIN

CS526 Enterprise and Cloud Computing Stevens Institute of Technology Assignment Four—Cloud Storage—Rubric

☐ 10: Project compiles, with basic structure we provided (layout and style sheets, can be customized with banner image and side bar links), with Home, Account and Images controllers.

☐ 15: (Video) Upload, image listing, details view, edit actions work with SQL Database specified in connection string in app settings file.

☐ 10: (Video) Images are stored in Blob storage, and links for images specify Blob storage (View Source in Web browser to check URI for image in Details page).

☐ 10: (Video) An image is deleted from blob storage when the image is removed (when the uploader is deactivated). ImageStorage and IImageStorage are modified to support this.

☐ 15: (Video) ImageViews action displays log of image viewing activity for today, ordered by the time at which the image was viewed. LogContext is completed to support this.

☐ 5: (Video) Supervisor authorization required for viewing logs.

☐ 30: (Video) App runs in App Service, using Azure storage as above.

☐ 5: Completed Rubric

Total:

Deployed to Azure App Service at :
